

Polyester pleated filter cartridges

Suitable for filtration of weak acids, weak alkalis, and most organic solvents **EJZ Series**

The EJZ series polyester pleated filter cartridge is made of polyester materials and is designed for pre-filtration and fine filtration of suspended solids and colloidal impurities in liquids. With high temperature resistance, it maintains its shape without deformation during long-term use, making it an ideal choice for many demanding industrial environments.

Product Features

- Suitable for filtration of weak acids, weak alkalis, and most organic solvents
- Suitable for adhesive types: silicone, acrylic, PU adhesives, etc.

Product Specification

Filter material	PBT、PTFE
Cage material	PBT
Center core / Housing / End cap material	PBT
Maximum operating temperature	120°C
Maximum operating differential pressure	4bar / 21°C 2.4bar / 80°C
